

New York Metro InfraGard is proud to announce it will host a world class, globally accessible 2009 IT Security CISSP certification training event.

Many in today's economy are seeking professional development opportunities and are aligning themselves for career advancement and/or changing career directions. This certification training will be offered as a 5-Day on-site training March 16<sup>th</sup> through the 20<sup>th</sup>, 2009; at Pace University's New York City campus located in Lower Manhattan. For those who cannot attend the onsite location, please join this week-long training event; LIVE, as it will be simulcast, as an asynchronous video-streamed program via the internet.

New York Metro InfraGard promotes the protection of our nation's critical infrastructures by breeding trust relationships and fostering education and communication between the private and public sectors.

Each Infragard chapter is geographically linked with an FBI Field Office, providing all stakeholders immediate access to experts from law enforcement, industry, academic institutions and other federal, state and local government agencies. By utilizing the talents and expertise of the Infragard network, information is shared to mitigate threats to our nations official infrastructures and key resources.

New York Metro Infragard will be working in conjunction with IP3 Inc. to delivery this IT Security training event. IP3 Inc. provides the most comprehensive and complete Information Assurance and IT Security training, to assure successful completion of the CISSP certification exam. This program was designed, developed and updated by the nation's leading experts in security education.

This 5-day boot camp is a comprehensive course that will also include a one year subscription to our 10-week online training program. The online training will provide additional resources for pre and post exam support. This gives you the advantage of building a strong foundation prior to sitting for the exam.

You begin by receiving a comprehensive study pack, consisting of self-study manuals, study guides, professional mentoring, and toll free telephone support. We will provide the student ample time to prepare and begin reviewing the 10 domains. The program begins with access to our on-line archive classes so you can gain the knowledge and expertise to come prepared for the course. The Boot Camp begins with an extensive overview of IT Security Principles and Practices, followed by an intense review and drill of the Ten Core Common Body of Knowledge subject areas. By laying the groundwork early, we allow you to focus closely on the important concepts during class.

### Your study pack will include:

- 5 Day Training Seminar that covers the CBK
- 45 Hours of On-line Sessions
- Archived Audio / Video Downloads
- Transcender Practice Exams
- 700+ page IP<sup>3</sup> Inc Workbook Set
- IP<sup>3</sup> Inc Security Tools CD
- Complimentary seat at our two-day “*Strategy to Reality*” seminar (can be used for 16 CEU’s)
- Shon Harris’ “CISSP® Certification All-in-One Exam Guide”
- 8GB Apple iPod Touch or 80GB Apple iPod Classic
- “NIST Guidelines” developed by IT security professionals for security professionals (in PDF format).
- Certificate of Completion
