$150,000 IT SECURITY SCHOLARSHIP FUND AVAILABLE

IP3 Inc. and CompTIA Offer IT Security Education Workshops

SAGINAW, MI – IP3 Inc., the nation's leader in Internet security education workshops and CompTIA, the Computing Technology Industry Association, are awarding $150,000 in scholarship seats for the 2006 workshop series *From Strategy to Reality: Securing the Converged Enterprise.*

"If you want to protect your business, this workshop is key," said Lori Conover who received a scholarship to attend IP3's San Diego workshop. "The workshop is an excellent balance of theory and real life situations and will bring you up to speed on various security products, cutting edge technology and recent case studies." While attending the workshop, Conover also won a CompTIA Security+ voucher and passed the certification test. "Most of the information covered in the IP3 workshop workbook was on the Security+ exam," she said.

The two-day program explores critical security items such as the NIST Guidelines, SANS/FBI Top 20 and the President's National Strategy to Secure Cyberspace, wireless deployment, spam, internal theft of intellectual property and

Sarbanes-Oxley compliance. Full and partial scholarships are being awarded for the $895 workshop.

"Participation in these security education workshops is a valuable benefit for our CompTIA IT professional members," said Gene Salois, vice president of certification for CompTIA. "With security such a key issue in the business process today, we encourage everyone to apply for these scholarship seats and take full advantage of the broad-based security education being offered."

At the end of the workshop, participants will be ready to create an effective security strategy utilizing the vast array of program materials: a comprehensive workbook identifying the latest security tools, bookmarks and URLs; the IP3 Security Tools CD, packed with security tools and resources; and access to ongoing updates from the experts at IP3.

"Billions of dollars are lost each year in security incidents," said Ken Kousky, CEO of IP3 Inc. "Organizations need to adopt an enterprise-wide, layered approach to IT security and assign necessary budgets to protect their IT infrastructure. In an effort to assist these organizations, IP3 and CompTIA decided to continue offering scholarship seats to our workshops."

From Strategy to Reality: Securing the Converged Enterprise is hosted in cities around the country. For a complete location listing, a workshop outline and an online scholarship application, visit ip3seminars.com or call 1-800-473-5181.
