**UTD AND U of D LAUNCH
OUTREACH EDUCATION PROGRAM WITH
LEADING IT SECURITY EXPERT**

UTD and U of D partnering with IP3 to offer faculty, students and corporations scholarship dollars

SAGINAW, MI – The University of Texas at Dallas and the University of Dallas are sponsoring a two-day workshop with IP3 Inc., the nation’s leader in information security education and research, Tuesday and Wednesday, March 9-10. *From Strategy to Reality: Managing the Porous Perimeters* will be offered at the Studio Movie Grill in Addison. U. T. Dallas and U of D faculty, students, and affiliated University partners are eligible for \$15,000 in scholarship funds to attend the workshop.

“Working with The University of Texas at Dallas and the University of Dallas is a tremendous opportunity,” said Ken Kousky, IP3 CEO. “These universities are innovative, technically-savvy institutions that understand the need to face security threats and move to prevent them.”

UTD AND U OF D SPONSOR IP3

“Offering their stakeholders scholarship opportunities to attend further illustrates their commitment to deliver educational programs to the local market.” says Kousky.

IP3’s workshop provides a balance of theory and real-case scenarios of how security systems have been breached and what solutions are out there to prevent it from happening to someone else’s business and other organizations.

“Cyber security has become a top issue in the U.S. with corporations and the government. IT education, such as this program, is critical in combating cyber crime and cyber terrorism,” said Dr. Douglas Harris, associate dean and executive director of the Digital Forensics and Emergency Preparedness Institute at The University of Texas at Dallas.

From Strategy to Reality: Managing the Porous Perimeters explores the latest critical security items such as the NIST Guidelines to help federal agencies fortify their systems, SANS/FBI Top 20 Vulnerabilities and the President’s National Security to Secure Cyberspace. In addition, the workshop addresses the top five IT security challenges identified by corporate security managers: multi-vendor integration, wireless device security, spam, internal theft of intellectual property and Sarbanes-Oxley compliance.
