**MICHIGAN'S LARGEST WIRELESS COMPUTER
NETWORK CUSTOMER TEAMS UP WITH LEADING
IT SECURITY EXPERT**

***Lawrence Tech partners with IP3 to offer faculty, students and
corporations scholarship dollars***

SAGINAW, MI – Lawrence Technological University, in Southfield, is hosting a workshop put on by IP3 Inc., the nation's leader in information security education and research. *From Strategy to Reality: Managing the Porous Perimeters* takes place Tuesday and Wednesday, Feb. 17 and 18, at Lawrence Tech's Technology and Learning Center, in the Lear Auditorium. LTU faculty, students and affiliated University partners are eligible for \$15,000 in scholarship funds to attend the workshop.

“Lawrence Tech was Michigan’s first totally wireless university to provide its students and faculty with hundreds of laptops each semester,” said Ken Kousky, IP3 CEO. “It’s a cutting-edge institution which relies heavily on technology to help its students learn and succeed.”

“Because of the importance technology plays in society, we want to make sure our students, faculty and our corporate partners have access to top notch programs like IP3’s workshop,” said Stephen Ragan, vice president for University Advancement. “In addition, the scholarship offerings make the workshop even more beneficial for our stakeholders.”

IP3’s workshop provides a balance of theory and real-case scenarios of how security systems have been breached and what solutions are out there to prevent it from happening to businesses and other organizations.

From Strategy to Reality: Managing the Porous Perimeters explores the latest critical security items such as the NIST Guidelines to help federal agencies fortify their systems, SANS/FBI Top 20 Vulnerabilities and the President’s National Strategy to Secure Cyberspace. In addition, the workshop addresses the top five IT security challenges identified by corporate security managers: multi-vendor integration, wireless device security, spam, internal theft of intellectual property and Sarbanes-Oxley compliance.
