**UNLV'S INSTITUTE FOR SECURITY STUDIES
LAUNCHES OUTREACH EDUCATION PROGRAM WITH
LEADING IT SECURITY EXPERT**

*ISS partnering with IP3 to offer faculty, students and
corporations scholarship dollars.*

SAGINAW, MI – University of Nevada Las Vegas' Institute for Security Studies (ISS) is hosting IP3 Inc., the nation's leader in information security education and research, Tuesday and Wednesday, February 3-4, for a two-day workshop. *From Strategy to Reality: Managing the Porous Perimeters* will be offered at the Institute's Educational Outreach building. ISS faculty, students and affiliated partners of the center are eligible for \$15,000 in scholarship funds to attend the workshop.

“IP3 and UNLV’s Institute for Security Studies partnership is a perfect fit,” says Ken Kousky, IP3 CEO. “The Institute is committed to bringing vital educational programs to the local market. They want to ensure that Las Vegas is no longer overlooked when it comes to providing the community with essential resources to address crucial issues such as homeland security.”

IP3’s workshop provides a balance of theory and real-case scenarios of how security systems have been breached and what solutions are out there to prevent it from happening to someone else’s business or organization.

“We’re very fortunate to host a nationally recognized IT security seminar at our Institute,” said Lee Van Arsdale, director of UNLV’s Institute for Security Studies. “And the fact that we are offering our stakeholders scholarship opportunities to attend is key. The scholarships eliminate a major barrier that prevents a lot of people from attending this type of educational and preparatory workshop.”

From Strategy to Reality: Managing the Porous Perimeters explores the latest critical security items such as the NIST Guidelines to help Federal agencies fortify their systems, SANS/FBI Top 20 Vulnerabilities and the President’s National Strategy to Secure Cyberspace. In addition, the workshop addresses the top five IT security challenges identified by corporate security managers: multi-vendor integration, wireless device security, spam, internal theft of intellectual property and Sarbanes-Oxley compliance.

“Las Vegas is a strategic security market,” Kousky says, “because of the many security issues the gaming industry faces, for instance data protection and legislative compliance. In addition, the large public events have made the entire community aware of the vital importance of a robust security infrastructure.” Las Vegas is one of 20 cities IP3 will visit during its 2004 national workshop tour.

For a workshop outline, registration information and event location information for this intensive 2-day overview on the latest security vulnerabilities and technologies, visit www.ip3seminars.com.

About IP3 Inc.

IP3 Seminars is a subsidiary of IP3 Inc. (www.ip3inc.com), the leader in Intellectual Publishing, Sales and Distribution. IP3 Inc. provides a full range of services targeted at assisting emerging and expanding technology companies including: strategic product guidance on modifying the IP product, educational marketing, technical training, product support, and channel development and management.

About UNLV Institute for Security Studies

The UNLV Institute for Security Studies combines the educational and research capabilities of a premier university with federal, state and local governmental organizations and private enterprise in order to analyze, research, teach, train and expand the body of knowledge relating to homeland security and combating terrorism in a coordinated/integrated fashion. UNLV is a doctoral-degree-granting institution with more than 26,000 students and over 800 faculty members. More than 180 undergraduate, master's and doctoral degrees are offered. Founded in 1957, UNLV is located on 337 acres in dynamic southern Nevada. The University is ranked in the category of Doctoral/Research Universities-Intensive by the Carnegie Foundation for the Advancement of Teaching.
